

## **EI Jebel RADOPS Repeaters & Frequencies**

The Ham Radio Operator members of EI Jebel Shrine in Denver, Colorado operate 2 repeaters that are **open for use by all licensed** amateur radio operators. They are located at the EI Jebel Shrine Center and have a wide coverage of the front range and the Denver Metro area.

The repeaters operate under call sign **KØFEZ** as follows:

**2 Meters** - Operates on 146.985 with a minus offset and a 100 Hz PL tone. This repeater has an auto patch available to members of the EI Jebel Radio Operators (RADOPS) unit. We are also willing to place authorized autopatch calls for others needing assistance or visitors to the area needing assistance.

**70 cm** - Operates on 447.925 with a minus offset and a 100 Hz PL tone. This repeater has a message capability for notifying members of important events.

**70 cm** - Operates on 447.925 with a minus offset and a 151.4 Hz PL tone. This repeater is used for special events such as parades and the Shrine Circus.

**KØFEZ Repeater Trustee** - Richard McElravy NWØJ

**KØFEZ Repeater Custodian** - EI Jebel Shrine Center

**Simplex Frequencies** - 145.625 & 445.625
